

We work with specific words and semantics quite a bit in PCT. One of the crucial skills we want you to master is the ability to distill ideas down into single words or phrases that carry great power and clarity. This assignment is the ultimate test and will help you explore the idea and its importance.

Assignment:

Since you have completed the Obituary Assignment, we will move next to perhaps one of the toughest challenges in our program. You must use a **SINGLE WORD** on your tombstone to sum up you, your life, and your priorities. No hyphens, no phrases - just one word. Imagine it on your tombstone, etched in granite for all eternity. You will need to explain it to your coach, so you have to know why this one word best sums you up. Don't be surprised if it takes a few tries.
